

One of Panoply's Latest Projects - The Delta Community Credit Union

One of our latest commercial projects is the interior design of the Delta Community Credit Union Atrium. Visit the new 1825 Summit building and Delta Community Credit Union Atrium on Highway 34 East to see the new furnishings, lighting and original artwork.

All interior selections for the space reflect the transitional nature of the building and correlate with the existing brown, blue and white color scheme selected by the architect for the building. Seating areas are defined by custom area rugs and were designed to be comfortable and durable.

One of the most exciting aspects of the project is the artwork installed in the space. Original works executed by the talented Craig McMillan and Georgie Dunn, both of Newnan, were designed specifically for the building. McMillan is nationally renowned and Dunn is a rising star in the art world. Both Craig and Georgie have their artist studio in the upstairs space of Panoply's downtown office. We are truly lucky to have them in Newnan and especially at Panoply!

Be sure to visit the 1825 Summit Building and let us know what you think!
